Fruit	Variety	Size/Price	Description
Bacopa monniera	Brahmi	Fruit Tree \$5.50	Used in traditional Indian medicine for over 3000 years and recent studies suggest it may improve memory and learning. Eat fresh or dry and make tea. Very easy to grow; best in damp conditions.
Bambaroo	Mango	Fruit Tree \$40.00	A grafted dwarf form of Kensington Pride Mango, the most popular cultivated variety due to it's superior taste and stringless flesh.
Banana Passionfruit	Passiflora mollissima	Fruit Tree \$10.00	A fast growing vine, bearing attractive pink flowers, followed by oblong yellow passionfruits with tasty pulp. A very vigorous plant, best grown in full sun. Do not plant adjacent to native forests; it does have weed potential.
Basella rubra	Malabar Spinach	Fruit Tree \$5.50	Tropical, fast-growing vine with edible fleshy leaves, used in cooking. Rich in Vitamin A & C, iron and calcium. Does best in full sun.
Bay Tree	Laurus nobilis	Fruit Tree \$12.00	Aromatic evergreen tree, originating from the Mediterranean, whose leaves are used in savoury cooking. Can be pruned to create a formal look.
Black Sapote	Diospyros nigra	Fruit Tree \$15.00	A large green skinned fruit with brown pulp, which is reminiscent of mild chocolate, and can be used in smoothies, cakes and muffins. Handsome large, but fairly slow growing tree. Seed grown.
Black Sapote (Chocolate Pudding Fruit)	Mossman	Fruit Tree \$40.00	A large green skinned fruit with brown pulp, which is reminiscent of mild chocolate, and can be used in smoothies, cakes and muffins. Mossman bears the largest fruit. A single tree can produce half a tonne of fruit!
Carica papaya	Red Papaya Seedling	Fruit Tree \$10.00	A small palm shaped tree bearing large delicious red fleshed fruit. It's best to plant a few to ensure pollination, as papaya trees can be female, male or bisexual. Likes a sunny spot, sheltered from wind.
Carob	Carob siliqua	Fruit Tree \$15.00	Medium sized bushy, spreading tree, grown for it's long brown pods, the beans inside of which are used in making chocolate substitutes. Drought tolerant. Nitrogen fixing.
Cocoa	Cocoa (Theobroma cacao)	Fruit Tree \$20.00	The "Chocolate Tree". Small evergreen tree that requires a humid climate with high rainfall, year-round warmth and protection from strong winds. It is an understory tree, growing best with some dappled shade.

Fruit	Variety	Size/Price	Description
Coffee plant	Coffea arabica	Fruit Tree \$12.00	Attractive, glossy leaved shrub to around 2m tall. Grow in full sun to semi-shade. Fragrant white flowers are followed by bright red berries, which each contain two coffee beans.
Curry Leaf Tree	Murraya koenigii	Fruit Tree \$15.00	Attractive shrub native to India, whose leaves are used to add flavour to curry (fry with the onions). Can be invasive, so it's best to keep in a pot.
Dream Herb	Calea zacatechichi	Fruit Tree \$5.00	This herb is traditionally used by the Chontal Natives of Oaxaca Mexico for enhancing dreams. Very easy to grow and tolerant of neglect. Search the internet for more information on it's use.
Drumstick Tree	Moringa oleifera	Fruit Tree \$15.00	Fast growing tree to 10m tall, which produces edible leaves, pods, seeds and roots. Leaves can be eaten raw or cooked and are particularly nutritious and high in protein.
Fruit Salad Plant	Monstera deliciosa	Fruit Tree \$15.00	Climbing or scrambling epiphyte with very attractive tropical foliage and an edible fruit. Often used as an indoor plant.
Giant Siam	Carambola	Fruit Tree \$40.00	Also known as "Star Fruit" or "Five Corner". Ornamental evergreen tropical tree that bears attractive juicy yellow fruit. Harvest fruit after it turns yellow. Giant Siam, large sweet variety. Grafted.
Grape	Menindee Seedless	Fruit Tree \$35.00	The best green variety for eating fresh. Produces best in hot, dry areas. Requires a trellis or fence to grow on. Fruit needs to be picked ripe.
Grapefruit	Rio Red	Fruit Tree \$35.00	Has less colour than Star Ruby and the colour of fruit on individual trees can vary. Needs to be harvested soon after maturity.
Grapefruit	Star Ruby	Fruit Tree \$35.00	Medium sized seedless fruit, smooth thin peel with dark red flesh, excellent quality. Harder to grow than other varieties. Early season.
Guava	Thai White	Fruit Tree \$15.00	Large fruit with white flesh and few seeds. Mild flavour, very popular in Asia. Easy to grow.

Fruit	Variety	Size/Price	Description
Hog Plum	Spondias cytherea	Fruit Tree \$20.00	Large, fast growing tree bearing oval shaped green to yellow fruit. Fruit is eaten raw, stewed or used to make jam. Unripe fruit is used in curries and pickles. Fruit is also fed to pigs (hence the name!) in it's native Polynesia.
Kaffir Lime	Citrus hystrix	Fruit Tree \$12.00	Attractive small tree with glossy green rounded double leaves which are used in Thai cooking. Full sun.
Kohala	Longan	Fruit Tree \$40.00	Small tree bearing large brown skinned fruit with white aromatic sweet jelly-like flesh. Related to Lychee but more vigorous.
Kumquat	Nagami	Fruit Tree \$35.00	Small evergreen tree. Thornless, with oval-shaped fruit that follow from the sweetly scented, white flowers opening in spring or early summer. Fruit can be eaten fresh, or used to make marmalade and preserves.
Kumquat	Marumi Variegated	Fruit Tree \$35.00	A highly ornamental cumquat with light green and pale yellow foliage. The dark orange fruit, which are rich in Vitamin C, can remain on the tree for a long time. They can be eaten fresh or used in jams and marmalades. Well suited to being kept as a pot specimen.
Lemon	Eureka	Fruit Tree \$35.00	Probably the most widely grown lemon in the world. It's a true lemon with high juice and acid content. Thin-skinned and virtually seedless.
Lemon	Lisbon	Fruit Tree \$35.00	Smooth skinned, large, juicy bitter lemon produced on a thorny tree. Most of the year.
Lemon	Meyer	Fruit Tree \$35.00	Natural hybrid between a lemon and an orange. Orange coloured fruit with a thin rind. Juicy and less acid than other lemons. Fruits more than once a year. Ideal for growing in pots.
Lemon Grass	Cymbopogon citratus	Fruit Tree \$12.00	Clumping grass to 1.5m tall with strongly lemon scented stems and leaves, used in Asian cooking, teas and sweets. Very easy to grow. Full sun to part shade.
Lime	Tahiti	Fruit Tree \$35.00	Small to medium fruit, pale yellow, smooth skin. Translucent pale green flesh, tender and juicy with a true acid lime flavour. Best to pick fruit green as it can suffer from rot if left to ripen on the tree. Fruits more than once a year.

Fruit	Variety	Size/Price	Description
Longan	Chompoo	Fruit Tree \$40.00	Closely related to lychees, but with a light yellowy brown skin instead of pink. This Thai variety bears large, good quality fruit with pink tinged flesh. Faster and easier to grow than Lychee.
Loquat	Eriobotrya japonica	Fruit Tree \$12.00	An attractive small bushy tree which bears succulent yellow fruits with tangy flesh, tasting like a mixture of peach and citrus. Originates from Asia.
Lychee	Bosworth No. 3	Fruit Tree \$40.00	Also known as Kwai Mai Pink. This very popular tree was brought to Australia from China in 1932. Small seeded, very sweet producing good crops every year. Mid season. Marcot cutting grown.
Mandarin	Emperor	Fruit Tree \$35.00	Large, very juicy fruit. Loose skinned with a good flavour. Fruits end of July, mid-late season.
Mandarin	Imperial	Fruit Tree \$35.00	Fruit has excellent colour and flavour. Skin is smooth, glossy, thin and semi-loose. Early season.
Mandarin	Page	Fruit Tree \$35.00	Cross between a tangelo and a mandarin. Medium size fruit, easily peeled, deep orange flesh colour, juicy, seedless.
Mango	Nam Doc Mai	Fruit Tree \$40.00	Thai type mango. Green-yellow skin, sweet and juicy with an excellent flavour. This thin mango tree likes growing in coastal areas.
Mango	R2E2	Fruit Tree \$35.00	Mid-season variety with large, highly-coloured fruit. The second most popular mango variety grown. Mature fruit is beautifully yellow with a strong red blush and firm, non-fibrous flesh.
Manihot esculenta	Cassava	Fruit Tree \$12.00	A shrub with attractive leaves, whose tuberous roots are harvested and are boiled, fried, baked or made into flour. It is important to cook the roots thoroughly before eating. The refined starch from the tubers is called Tapioca.
Miracle Berry	Synsepalum dulcificum	Fruit Tree \$15.00	A medium shrub with an edible berry; after it is eaten, sour foods taste sweet! Also said to counteract the metallic taste which is a side effect of chemotherapy. Slow growing. Likes a low pH. Does well in a pot.

Fruit	Variety	Size/Price	Description
Musa acuminata	Banana "Cavendish"	Fruit Tree \$25.00	A popular variety of banana that produces very sizeable bunches of large fruit. This is the most common variety in the supermarket. A tropical clumping plant growing up to 4m high. Plant in a sunny spot away from wind.
Navel Orange	Washington	Fruit Tree \$35.00	Main navel variety grown in Australia. Excellent skin colour and taste, round seedless fruit. Mid-season.
Orange	Late Valencia	Fruit Tree \$35.00	Large, oblong, firm fruit with a good flavour. Very juicy. Holds well on the tree. Late season.
Passiflora quadrangularis	Giant Granadilla	Fruit Tree \$15.00	Largest fruit in the passionfruit family. The fruit has white flesh which tastes like pear, and sweet acidic pulp in the middle. Requires a trellis.
Passionfruit	Panama	Fruit Tree \$15.00	Commercial passion fruit variety with purple fruit. Highly suited to tropical climate. Climber. Needs good drainage and full sun. Cutting grown.
Pepper	Piper nigrum	Fruit Tree \$10.00	Fresh pepper tastes best! A tropical vine best grown on a trellis or support and mulched well. Self pollinating. For black pepper, the immature fruits are dried with the skin on; white pepper is the seed of the mature fruit only, without the skin.
Persicaria odorata	Vietnamese Coriander	Fruit Tree \$5.50	An intensely flavoured herb that is mainly used in Asian dishes, such as Laksa. Plants will grow best in warm, damp conditions.
Pineapple	Ananas comosus	Fruit Tree \$8.00	Pineapples are actually bromeliads! The familiar fruit grows on a short stalk in the middle of the spiky plant. Pick when already ripe - they don't ripen much after picking. Full sun.
Pomelo	K13	Fruit Tree \$35.00	Tropical citrus fruit with large thick skin. Similar to a grapefruit although sweeter and far less cold tolerant. White fleshed variety with giant size fruit. Good for coastal areas.
Pummelo	Nam Roi	Fruit Tree \$35.00	Huge round fruit which have pale yellow flesh and taste like a sweet grapefruit. Nam Roi is a popular seedless variety, originating in Vietnam.

Fruit	Variety	Size/Price	Description
Queensland Nut	Macadamia integrifolia	Fruit Tree \$20.00	Produces the well known Macadamia nut. Bushy tree with shiny dark green leaves, growing up to 14m tall. Seed grown.
Rosmarinus officinalis	Rosemary	Fruit Tree \$5.50	Perennial plant to 60cm tall. The aromatic leaves are useful in all sorts of dishes, especially roast meats and roast veggies, and lamb. Repels moths and flies, and attracts bees for pollination. Likes a sheltered, sunny position.
Seedless Valencia	Orange	Fruit Tree \$35.00	A seedless form of Valencia orange, with exceptional flavour. Fruits a little earlier, and is a heavy cropper. Plant in full sun. Grafted.
Star Apple	Chrysophyllum cainito	Fruit Tree \$25.00	Large, shady tree with attractive bronze undersides to the leaves. Bears round purple skinned fruit with juicy purple & white flesh. Best eaten fresh and chilled.
Sweet Dragon Bamboo	Dendrocalamus brandisii	Fruit Tree \$15.00	A tall clumping (not spreading) bamboo that produces thick upright stems which are excellent for building, due to their size and strength. Height to 25m. New shoots are edible. Does best in a well drained but moist location.
Sweet Leaf	Sauropus androgynus	Fruit Tree \$12.00	Tropical shrub whose tender leaves taste like fresh peas - beautiful! Use in salads or anywhere you would use spinach. Height to 2.5m. Full sun or part shade.
Tamarillo	Solanum betaceum	Fruit Tree \$10.00	Medium shrub in the tomato family, bearing clusters of red egg-shaped fruit with orange flesh, tasting a bit like a mix of passionfruit and tomato (it's nicer than it sounds!). Can be eaten fresh, stewed or used in desserts.
Tangelo	Citrus x. tangelo	Fruit Tree \$35.00	The tangelo is a citrus hybrid between tangerine and grapefruit. The fruits are the size of an adult fist and have a tangerine taste, but are very juicy and have loose skin.
Tea Plant	Camelia sinensis	Fruit Tree \$12.00	Evergreen shrub or small tree trimmed to below 2m when cultivated for its leaves. Flowers yellow-white. Mainly cultivated in subtropical and tropical areas. Grow in rich and moist soil.
Thymus citriodorus	Lemon Thyme	Fruit Tree \$5.50	A sprawling herb with tiny leaves used in savoury cooking, in salads and in herbal teas. Also used for it's aromatic properties. Grow in sun or part shade.

Fruit	Variety	Size/Price	Description
